Stage #JU6

Pending

```
+FULLRESYNC <REPL_ID> 0\r\n
```

You can ignore the response for now, we'll get to handling it in later stages.

## Tests

The tester will execute your program like this:

```
spawn_redis_server.sh --port <PORT> --replicaof "<MASTER_HOST> <MASTER_PORT>"
```

It'll then assert that the replica connects to the master and:

- **(a)** sends PING command
- **(b)** sends REPLCONF listening-port <PORT>
- **(c)** sends REPLCONF capa eof capa psync2
- **(d)** sends PSYNC ? -1
