

Test Case 4:

Input:

```
var hello = 65;  
var baz;  
var quz;  
  
hello = baz = quz = hello * 2;  
print hello;  
print baz;  
print baz;
```

Expected Output:

```
130  
130  
130
```

The tester will assert that the stdout of your program matches the format above, and that the exit code is 0.
