

```
],  
[  
  "1526985054079-0",  
  [  
    "temperature",  
    "37",  
    "humidity",  
    "94"  
  ]  
],  
]
```

When encoded as a RESP list, it looks like this:

```
*2\r\n  
*2\r\n  
$15\r\n1526985054069-0\r\n  
*4\r\n  
$11\r\ntemperature\r\n  
$2\r\n36\r\n  
$8\r\nhumidity\r\n  
$2\r\n95\r\n  
*2\r\n  
$15\r\n1526985054079-0\r\n  
*4\r\n  
$11\r\ntemperature\r\n  
$2\r\n37\r\n  
$8\r\nhumidity\r\n  
$2\r\n94\r\n
```

In the code block above, the response is separated into multiple lines for readability. The actual return value doesn't contain any additional newlines.

Tests

The tester will execute your program like this:

```
$ ./spawn_redis_server.sh
```

Ready to run tests...
