This is the RESP encoded representation of the following.

```
[
  [
    "0-2",
    [
      "bar",
      "baz"
    ]
  ],
  [
    "0-3",
    [
      "baz",
      "foo"
    ]

```

Notes

- In the response, the items are separated onto new lines for readability. The tester expects all of these to be in one line.
