Your Task

PendingShare Feedback

MEDIUM

In this stage, you'll add support for scanning the division operator & comments. Comments start with `//`, and the division operator is `/`.

Book reference

The code for this stage is implemented in [Section 4.6: Longer Lexemes](#).

Tests

The tester will run a series of tests with `test.lex` files that contain `/` & `//` mixed with previously introduced tokens.

For example, if `test.lex` contains the following:

```
() // Comment
```
