

[Instructions](#) [Code Examples](#) [Forum](#)Stage #RA8 **Pending**

For example, if `test.lox` contains the following:

```
42.47
```

The tester will run your program like this:

```
$ ./your_program.sh parse test.lox
42.47
```

The tester will assert that the stdout of your program matches the format above.

Notes

- This output format matches the spec in the [book's repository](#).
