Repository Setup ✓ Completed

Instructions

You've completed this step.

[Back to "Respond to PING"](#)

Repository Setup ✓ Completed

We've prepared a starter repository with some Rust code for you.

✓ Clone the repository

command line

copy

```
git clone https://git.codecrafters.io/27cd143210f737e7 codecrafters-redis-rust
cd codecrafters-redis-rust
```

✓ Push an empty commit

command line

copy

```
git commit --allow-empty -m 'test'
git push origin master
```

~~When you run the above command, the "Listening for a git push" message below will change, and the first stage will be activated.~~

Git push received! The first stage is now activated.
