Stage #BS1

Pending

Your server should respond with the following:

```
*1\r\n
*2\r\n
$9\r\nstream_key\r\n
*1\r\n
*2\r\n
$3\r\n0-2\r\n
*2\r\n
$11\r\nntemperature\r\n
$2\r\n96\r\n
```

This is the RESP encoded representation of the following.

```
[
  [
    "stream_key",
    [
      "0-2",
      [
        "temperature",
        "96"
      ]
    ]
  ]
]
```

It'll send another `XREAD` command to your server with the `BLOCK` command but this time, it'll wait for 2000 milliseconds before checking the response of your server.

```
$ redis-cli XREAD block 1000 streams stream_key 0-2
```

Your server should respond with `$-1\r\n` which is a `null` representation of a RESP bulk string.

Note
