

[Instructions](#) [Code Examples](#) [Forum](#)Stage #KU4 **Pending**

Send in the request.

- The `topic_id` field in the response should be equal to the topic UUID of the topic.
- The partition response should contain details of the 2 partitions assigned to the topic.
- There should be 2 partition responses.
- The error code in both the partition responses should be `0` (NO_ERROR).
- The `partition_index` field in both the partition responses should be equal to the partition ID of the partition assigned to the topic.

Notes

- The official docs for the `DescribeTopicPartitions` request can be found [here](#).
