Stage #JZ6

Pending

**sarp** 9 months ago**How to create an example RDB file:**

Open two Terminal windows

Terminal #1> `redis-server`

Terminal #2> `redis-cli set mykey myval` Terminal #2> `redis-cli save`

On Terminal #1:

- Press `ctrl + c` to shut down `redis-server`. You'll see `dump.rdb` created
- To inspect its contents you can use: `hexdump -C dump.rdb`
