Stage #SG9

Pending

ERR value is not an integer or out of range:42

The tester will also verify that the last command was successfully executed and that the key `bar` exists:

```
$ redis-cli
```

```
> GET foo (expecting "$3\r\nabc\r\n" as the response)
```

```
> GET bar (expecting "$2\r\n42\r\n" as the response)
```

Notes

- There are a subset of command failures (like syntax errors) that will cause a transaction to be aborted entirely. We won't cover those in this challenge.
