Concept

Stage #YZ1

Pending

```
$ sleep 0.2 && redis-cli GET foo
```

It'll expect the response to be `$-1\r\n` (a "null bulk string").

Notes

- Just like command names, command arguments are also case-insensitive. So `PX`, `px` and `pX` are all valid.
- The keys, values and expiry times used in the tests will be random, so you won't be able to hardcode a response to pass this stage.

The official Redis implementation handles expiry in two ways: "Active" and "Passiv

Ready to run tests...
