

[Instructions](#) [Code Examples](#) [Forum](#)Stage #XY1 **Pending**

print statement.

For example, if `test.lox` contains the following

```
print "Hello, World!";
```

The tester will run your program like this:

```
$ ./your_program.sh run test.lox
Hello, World!
```

The tester will run multiple such tests with randomized expressions, for example:

Input	Expected output
<code>print "Hello, World!";</code>	Hello, World!
<code>print 42;</code>	42
<code>print true;</code>	true
<code>print 12 + 24;</code>	36

The tester will assert that the stdout of your program matches the format
