12 Month celebration
30 December, 2023

Beginner:

What would I do if I were to start over again to contribute? [Get foot in the door up to 10,000 to 20,000 taka? Or 100,000 USD or 230,000 USD because have to upgrade health, peace of mind, relief from constant disappointment]

- [ ] First seeing the issue and PRs then Learn only to understand that part of the code.
- [ ] Draw a brief & rough map of the issues/PRs. Then decide I want to understand this section no matter what.
- [ ] Then Learn only to understand that part of the code. When I hit my 4000 words understanding for the day and then I'm done and then I'll play video games. Addictive to useful things, it should be addictive enough. All that experiment testing, it should feel good.
- [ ] Learn code: Rust by example , block, blocks, youtube.
- [ ] PRs will be solid but small, and well thought out. The Pull Request will be duct taping from the standard library and from the language.
- [ ] Git profile improve by adding blog section with 5 blogs, …etc

- What are my top priorities for today? Most important tasks or goals you want to accomplish.
- Consider any challenges or obstacles you anticipate facing today. How can you prepare yourself mentally and emotionally to navigate these difficulties effectively?
