Respond to PING #RG2   In-progress

📄 Instructions   </> Code Examples   ▶ Screencasts   🎓 Concepts   💬 Forum

---

How to pass this stage

In this stage, you'll implement your own solution. Unlike stage 1, your repository doesn't contain commented code to pass this stage.

98% of users who attempt this stage complete it.

Step 1: Read instructions   [Expand]

Step 2: Implement solution

Step 3: Run tests

Your Task   In-progress   EASY

In this stage, you'll implement support for the **PING** command.

Redis clients communicate with Redis servers by sending "**commands**". For each command, a Redis server sends a response back to the client. Commands and responses are both encoded using the **Redis protocol** (we'll learn more about this in later stages).

PING is one of the simplest Redis commands. It's used to check whether a R
