Create one for your team.

The tester will run multiple such tests with randomized expressions, for example:

Input	Expected output
print "Hello, World!";	Hello, World!
print 42;	42
print true;	true
print 12 + 24;	36

The tester will assert that the stdout of your program matches the format above, and that the exit code is 0.

Notes

- This output format matches the spec in the **book's repository**
