📄 **Instructions**   </> Code Examples   🎓 Concepts   💬 Forum   **Stage #NA2**   (Pending)

Notes

- The `WAIT` command should return when either (a) the specified number of replicas have acknowledged the command, or (b) the timeout expires.

- The `WAIT` command should always return the number of replicas that have acknowledged the command, even if the timeout expires.

- The returned number of replicas might be lesser than or greater than the expected number of replicas specified in the `WAIT` command.
