partition assigned to the topic.

- The error code in the partition response should be 0 (no error).

- The `partition_index` field in the partition response should match the partition ID of the partition assigned to the topic.

Notes

- The official docs for the `DescribeTopicPartitions` request can be found here.

- The official Kafka docs don't cover the structure of records inside the `__cluster_metadata` topic, but you can find the definitions in the Kafka source code here.
