Scanning: Other single-character tokens #XC5 Pending

Complete previous stages to gain access to this stage.

📄 Instructions   ‹/› Code Examples   💬 Forum

Your Task   Pending   Share Feedback   MEDIUM

In this stage, you'll add support for scanning other single-character tokens, namely `,` , `.` , `-` , `+` , `;` and `*` . `/` is not covered here, it's covered in later stages.

Book reference

The code for this stage is implemented in **Section 4.5: Recognizing Lexemes**.

Tests

The tester will run a series of tests with `test.lox` files that contain parentheses, braces combined with all the new single-character tokens.

For example, if `test.lox` contains the following:

RECENT ATTEMPTS 11

Mari…

garvi…

fb1

Aida…

aaro…

GZya…

wynn…

praaa…

Piyach5

flipped…

Tests failed. ❓   Show logs
