Fetch with an unknown topic #HN6 (Pending)

Complete previous stages to gain access to this stage.

📄 Instructions   </> Code Examples   💬 Forum

Your Task (Pending) [Share Feedback]   MEDIUM

In this stage, you'll implement the Fetch response for an unknown topic.

🚧 **We're still working on instructions for this stage**. You can find notes on how the tester works below.

In the meantime, please use **this link** to ask questions on the forum.

Tests

The tester will execute your program like this:

```
$ ./your_program.sh
```

It'll then connect to your server on port 9092 and send a `Fetch` (v16) request. This request will contain a single topic with an unknown topic ID
