```
$ ./your_program.sh tokenize test.lox
LEFT_PAREN ( null
LEFT_PAREN ( null
RIGHT_PAREN ) null
EOF  null
```

The tester will assert that the stdout of your program matches the format above.

Notes

- This output format matches the spec in the **book's repository**

- When scanning for tokens, it's valid to have "unbalanced" parentheses. When we get to parsing expressions in later stages, these cases will be highlighted as errors.
