Book reference

The code for this stage is implemented in **Section 4.6.2: Number literals**.

Tests

The tester will run a series of tests with `test.lox` files that contain number literals mixed with previously introduced tokens.

For example, if `test.lox` contains the following:

42

Mari...

garvi...

fb1

Aida...

aaro...

wynn...

Beyra...

Piyach5

flipped...

Priyath...
