Handle APIVersions requests #PV1   Pending

Complete previous stages to gain access to this stage.

📄 Instructions   </> Code Examples   💬 Forum

Your Task   Pending   Share Feedback   HARD

In this stage, you'll implement the response body for the `APIVersions` request.

🚧 **We're still working on instructions for this stage**. You can find notes on how the tester works below.

In the meantime, please use **this link** to ask questions on the forum.

Tests

The tester will execute your program like this:

```
$ ./your_program.sh
```

It'll then connect to your server on port 9092 and send a valid `APIVersions`
