For example, if `test.lox` contains the following

```
{
    var world = "before";
    {
        var world = "after";
        print world;
    }
    print world;
}
```

The tester will run your program like this:

```
$ ./your_program.sh run test.lox
after
before
```

The tester will run multiple such tests with randomized expressions, for example:

Test Case 1:
